INFORMATION ON COMPUTER BASED TESTS

What kind of examination will it be?

Computer-Based tests consisting of multiple choice questions are conducted in English (see examples at the end). Each question will have four possible answers. Your task will be to select the one best answer to each question. There will be **ONLY ONE CORRECT ANSWER** to each question. For the degree courses other than MBBS (BSc Nursing & Allied Health Science Degree Courses), there are 60 questions each in Physics, Chemistry and Biology (120 minutes total time). For all the Group A degree courses, except MBBS, an Aptitude Assessment computer based test, consisting of 120 questions in General Ability including Speed and Accuracy and also a few questions on issues of current topical interest is conducted. **There are 120 questions in General Ability in two sections. Section I with 60 questions to be answered in 50 minutes and Section II with 60 questions to be answered in 20 minutes**

For the Diploma courses, the examination in Science paper consists of 25 questions each in Physics, Chemistry, Biology and 15 questions in General ability. The duration of the exam will be 90 minutes.

For other courses where a background in science is not required, the non-science paper will have 90 questions including English, General Ability, speed and accuracy and a few questions on issues of current topical interest. The duration of the exam will be 90 minutes.

For courses which require a special paper, there will be 90 questions pertaining to that particular subject. The duration of the exam will be 90 minutes.

In case of any unforeseen circumstances the Exam City can be cancelled at any point of time and a new Exam City can be allotted en bloc with due intimation in newspapers / website. CMC reserves the right to reschedule the date / time of the exam.

How should I answer the Computer Based Test?

You can familiarize yourself with the computer based test by answering the **sample mock test** that will be made available on the CMC Vellore website around one month before the date of the computer based test.

- The questions will appear in English.
- Every question is followed by 4 answer options. Choose the option that is most appropriate. Indicate your answer by clicking on the circle adjacent to the option you think is right.
- You can go to any question directly by clicking on the question number, which will appear at the bottom of the screen. The answered question number will and the unanswered/ skipped question number will appear in different colour.
- If you are doubtful of the answer, you can mark a question for review. To unmark the question marked for review you have to come back to the same question and click on the question number.
- If you want to change your answer to any question, you may select the question and change the answer by clicking on the appropriate answer.

How fast should I work?

Although most of the tests stress on accuracy more than speed, it is important for you to use your time as economically as possible. **Work steadily and as fast as you can, but with care.**

Do not worry if you cannot answer all the questions. No one is expected to know the answers to all the questions. Do not waste time on questions that are too difficult for you but go on to the other questions and come back to the difficult ones later.

Should I Guess? Is there negative marking?

Since the possible answers for each question are provided, you may wonder whether or not to guess the answer for questions you are not certain about. **There is no negative marking** and hence at times it may be worthwhile making an intelligent guess. That choice is yours and you have to decide how close to the options you are. In the computer based test for degree courses (Nursing, AHS degree courses), credit is given for **questions not attempted** (those left blank). The **credit given** is equal to 1/5 (**0.2**) of the mark for that question. So your score will probably be more if you leave out the questions about which you know nothing. Remember, however, that a **correct answer** will be given **one full mark**. So if you have some knowledge of the question, and are able to eliminate one or more of the possible answers, your chances of guessing the correct answer increases. It may be to your advantage to attempt such questions.

How should I prepare for these tests?

These tests have been designed to measure your knowledge, understanding and ability and not just your memory. It will help to review your science course carefully, making sure that you UNDERSTAND each subject thoroughly.

Some sample questions from each of the various tests are given below. These cover most of the types of questions that will be asked. However there may be some other varieties also. **Familiarize yourself with the model questions given below and with the mock test that will be made available on the CMC Vellore website around one month before the date of the computer-based test.**

What is the syllabus?

The syllabus for the common entrance tests (unless otherwise specified) will be a mixture of 'plus two' level boards recognised by the TN Dr MGR Medical University. Wherever there is a special paper for a particular course, the questions will be related to that subject. Please see the course description in the prospectus.

What will I need at the examination?

You should have your Hall Ticket with you. Take with you two pencils. This is all that you will need for the examination.

You will NOT be permitted to take rough paper, scales, calculators, logarithm tables, drawing instruments, or MOBILE PHONES into the examination hall, as they are NOT needed.

How are selections made?

Soon after the examination, dummy numbers are assigned to each candidate and all further corrections and computations are done anonymously. Selection to the Step-2 is done purely on the basis of inter-se merit. The interviews and other special tests focus on evaluating the person and his/her aptitude for the course.

(For the computer based entrance test, you will have to answer by clicking on the button adjacent to the option you think is correct)
