The purpose of education is to culture the mind of a man so that he can accomplish all his aims in life. Education, to justify itself, should enable a man to use the full potential of his body, mind and spirit. It should also develop in him the ability to make the best use of his personality, surroundings and circumstances so that he may accomplish the maximum in life for himself and for others.

Maharishi School of Science and Humanities

The Maharishi School of Science and Humanities is constituted of two departments- Department of Applied Science and Department of Humanities. Applied Science (in strict sense, as in natural and formal Science e.g. Biology, Chemistry, Physics, Mathematics) and Humanities are one of the important aspects of learning from the very beginning of our education. They help us in logical thinking and understanding the world around us.

Department of Applied Sciences imparts education in disciplines such as Zoology, Botany, Physics, Chemistry, Mathematics and Biotechnology. Although, science is considered as one of the difficult branches of learning but it's the most natural of all, which deals with most of the day to day things happening around us; some of which we just fail to appreciate and take them for granted. Its one of those branches of learning which can help to make our life brighter and better living.

Department of Humanities deals with the study of a wide range of disciplines such as History, Political Science, Sociology, Psychology, English, Economics, Hindi and Education. Humanities are a field of academics that deals with a scientific study of the human society and culture. Their study can facilitate deeper intercultural understanding and lay the groundwork for a civically engaged life.
