

MAH MBA CET 2025 (April 2 Session 1) Memory Based Question Paper With Solution

1. What is the scientific name of the black spider?

- (A) *Latrodectus mactans*
- (B) *Loxosceles reclusa*
- (C) *Araneus diadematus*
- (D) *Tegenaria agrestis*

Correct Answer: (A) *Latrodectus mactans*

Solution: The scientific name for the black widow spider is *Latrodectus mactans*. This species is commonly known for its venomous bite and distinctive black coloration with a red hourglass marking on its abdomen.

Quick Tip

Black widow spiders are notorious for their potent venom, but they are generally not aggressive unless provoked.

2. What is the school of fishes called?

- (A) Shoal
- (B) Pod
- (C) Pack
- (D) School

Correct Answer: (A) Shoal

Solution: A group of fish swimming together is called a "shoal". If they are moving in a coordinated manner, it is referred to as a "school". "Shoal" generally refers to a group without coordination.

Quick Tip

Remember, the term "school" specifically refers to fish that are swimming in coordinated movement, while "shoal" refers to any group of fish.
