Maharashtra Board Class 12 Chemistry Question Paper 2019 (February 27)

# **BOARD QUESTION PAPER: MARCH 2019** CHEMISTRY

#### Notes:

- All questions are compulsory. 1.
- Draw neat, labelled diagrams and write balanced chemical equations wherever necessary. 11.
- Question paper consists of 29 questions divided into FOUR sections, namely A, B, C and D. iii.
- Section A: Select and write the most appropriate answer from the given alternatives for Q. No 1 to 4 of iv. multiple choice type questions carrying one mark each. Q. No 5 to 8 are very short answer type questions carrying one mark each.
- Section B contains Q. No. 9 to 15 of short answer-I type questions carrying two marks each. Internal V. choice is provided to only one question.
- Section C contains Q. No. 16 to 26 of short answer-II type questions carrying three marks each. V1. Internal choice is provided to **only one** question.
- vii. Section D contains Q. No. 27 to 29 of long answer type questions carrying five marks each. Internal choice is provided to each question.
- viii. For each MCQs, correct answer must be written along with its alphabet,
  - e.g., (A) ...... / (B) ..... / (C) ...... / (D) ...... etc.
- In case of MCQs, (i.e. Q. No. 1 to 4), evaluation would be done for the first attempt only. ix.
- Start each section on new page. X.
- xi.
- X11.

#### Given:

bromine (C)

iodine (D)

A system absorbs 6 kJ of heat and does 1.5 kJ of work on its surroundings. The change in internal **Q.4** energy is . (1)– 7.5 kJ – 4.5 kJ (B) (A) +7.5 kJ+ 4.5 kJ (C)(D)

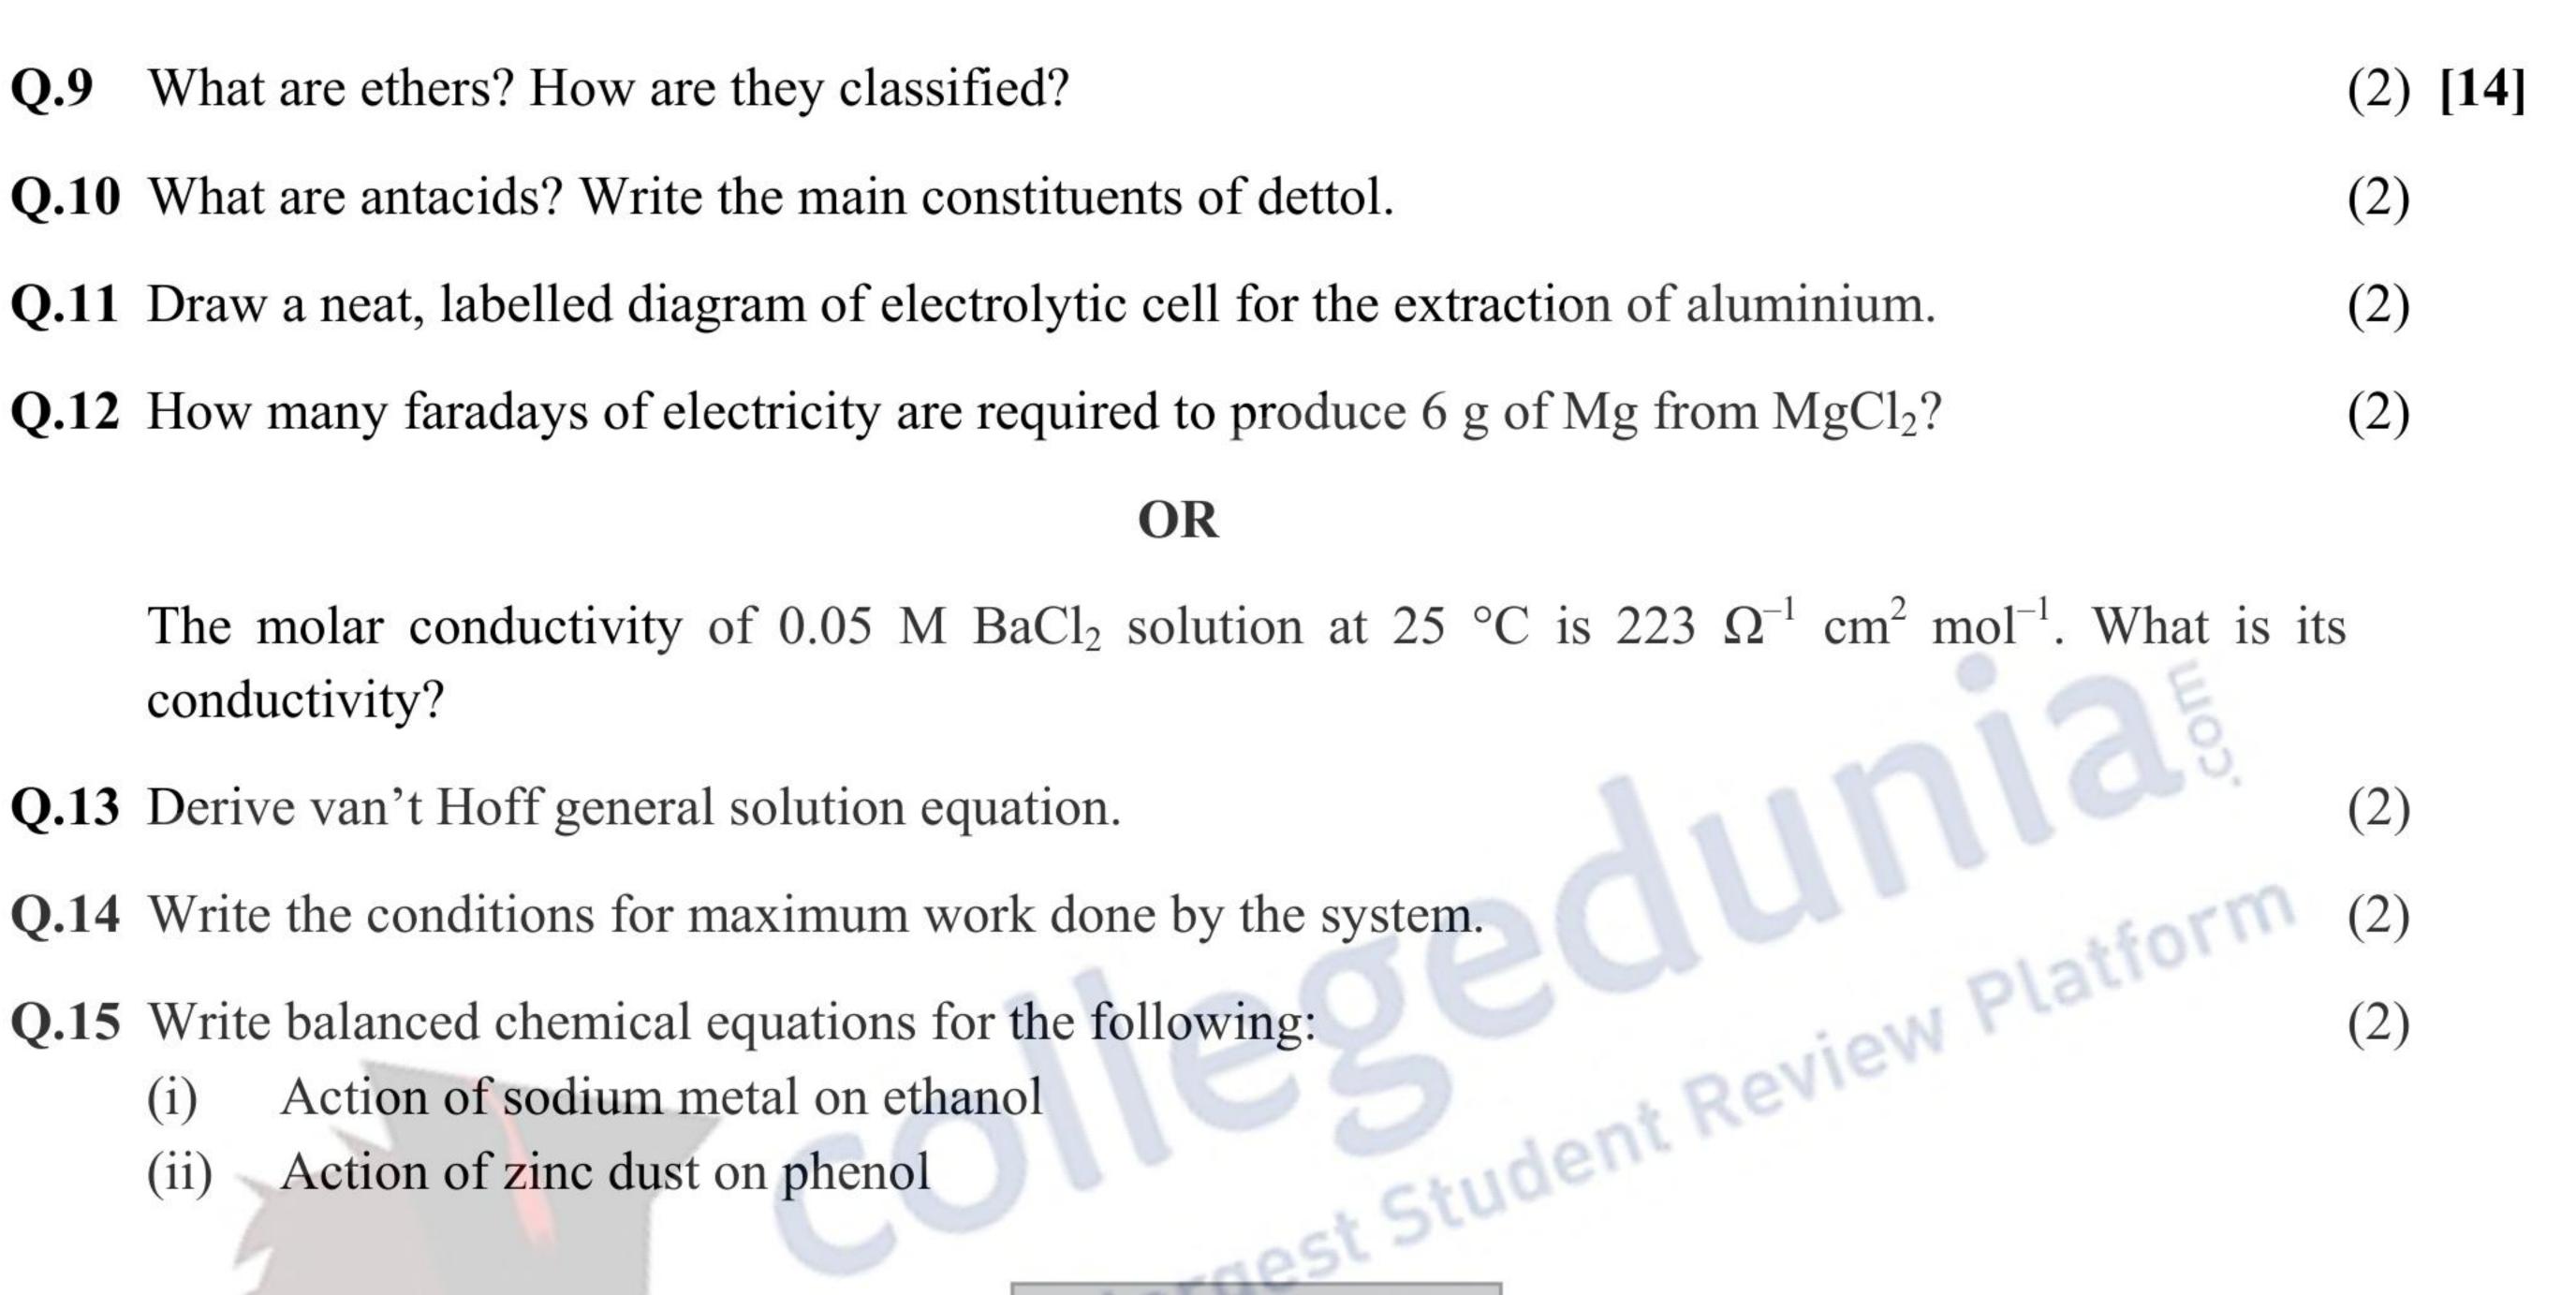

535

(1)

- Write the number of hydroxyl groups present in  $\alpha$ –D–(+) Glucopyranose (trans). **Q.6**
- What is Nessler's reagent? (1)**Q.7**
- What is the ratio of octahedral holes to the number of anions in hexagonal closed packed structure? (1) **Q.8**

### **SECTION B**

**SECTION C** 

- Action of zinc dust on phenol (ii)

**Q.16** Write chemical reactions to prepare the following polymers:

- Teflon (1)
- Nylon -6(ii)
- Dextron (111)

Q.17 How is glucose prepared by commercial method? How is peptide linkage formed?

Q.18 Write a short note on Hoffmann elimination.

**Q.19** What is the action of the following on ethyl bromide

- alcoholic solutions of potassium hydroxide (i)
- moist silver oxide (ii)

(iii) silver acetate?

- Q.20 What is effective atomic number? Calculate effective atomic number of copper (Z = 29) in  $[Cu(NH_3)_4]^{2+}$ . (3)
- Q.21 Write chemical reactions for differen steps in the manufacture of sulphuric acid by lead chamber process. Draw the structure of phosphorus pentachloride. (3)

536

(1)

(3) [33]

(3)

(3)

(3)

- Q.22 Write Arrhenius equation. Derive an expression for temperature variations.

**Q.23** Define electrochemical series. Write its applications.

Q.24 Calculate the work done in the following reaction at 50 °C. State whether work is done on the system or by the system. (3)

$$SO_{2(g)} + \frac{1}{2}O_{2(g)} \longrightarrow SO_{3(g)}$$

OR

The standard enthalpy of combustion of formaldehyde is  $\Delta_c H^\circ = -517$  kJ. How much heat will be evolved in the formation of 22 g of CO<sub>2</sub>?

- **Q.25** Define the following terms:
  - Isotonic solution (1)
  - Hypertonic solution (ii)
  - (iii) Hypotonic solution

**Q. 26** Define Anisotropy. Distinguish between crystalline solids and amorphous solids.

## **SECTION D**

- **Q. 27** (A) Write the structure of phenylmethanamine.
- 's largest Student Review Pla Write chemical equation for the following: **(B)** 
  - Gatterman–Koch formylation (1)
  - **Rosenmund** reduction (11)
  - Fischer esterification (iii)
  - Hell-Vohlard-Zelinsky reaction (iv)

OR

- What are amines? (A)
- How will you convert **(B)** 
  - calcium acetate to acetaldehyde (1)
  - acetone to acetone cynohydrin (11)
  - sodium acetate to methane (111)
  - benzoic acid to m-bromobenzoic acid? (1V)
- Define Enantiomers. **Q. 28** (A)
  - How is potassium dichromate prepared from chrome iron ore? **(B)**

(1)(4)

(1)

(4)

(1)

(4)

(3)

(3)

(3)

(3)

(1) [15]

(4)

### OR

- What is Grignard reagent? (A)
- Explain the position of actinoids in the periodic table. **(B)** What is the action of sulphur on lanthanoids?

Calculate the magnetic moment of divalent ion in aqueous solution if its atomic number is 24.

537

- The rate of a first order reaction,  $A \rightarrow B$  is  $5.4 \times 10^{-6}$  Ms<sup>-1</sup> when [A] is 0.3 M. Calculate the **Q. 29** (A) rate constant of the reaction. (1)
  - Explain the following properties of group 16 elements: (B)
    - Electronegativity (i)
    - (ii) Melting and boiling points
    - Metallic character (iii)
    - Allotropy (1V)

- The half life period of a first order reaction is 6.0 h. Calculate the rate constant. (A)
- What are oxides? **(B)**

Write different types of oxides with one example each.

538

(4)

(1)
