Amrit Raj

"Choosing Lloyd was the best decision for my engineering career. B.Tech (CSE) program equipped me with deep technical knowledge and practical experience through internships and collaborative projects. Today, I work with cutting-edge technologies and can confidently say that my time at Lloyd provided me with the skills and network needed to excel in the tech industry."

"Lloyd's placement support significantly contributed to my successful job placement. The expert guidance and encouragement provided were instrumental during the interview process."

Industry Partners

OUR VISION

To be a leading institute recognized for its exceptional training and placement record, transforming students into globally competent professionals through rigorous academic programs, practical skill development, and strong industry partnerships.

OUR MISSION

02

To foster strong partnerships with industry leaders, creating a dynamic learning environment that provides students with real-world exposure and facilitates successful placements.

01

To equip students with cutting-edge technical skills and industry-relevant knowledge, ensuring they are highly employable in today's competitive market

03

To provide comprehensive training and career guidance, empowering students to make informed career choices and achieve their professional aspiration.

Our Training & Placement Team

Prof. Piyush Garg

Chief-Industry Interface & Placement
(Ex. VP Lyntra & Fiserv) 30+ Industry Experience

“In the era of exponential technological evolution, I extend a warm welcome to all prospective candidates & students of LIET”

At our institution, we recognize the pivotal role of staying ahead in the ever-changing landscape of technology. Our commitment extends beyond traditional education; we strive to equip you with cutting-edge skills, innovative thinking, & adaptability to thrive in the fast-paced world of technology. As you embark on your educational journey with us, you will be exposed to the latest advancements, industry insights, & practical experiences that will prepare you for the challenges & opportunities of tomorrow.

Through a well-established setup such as Lloyd Skill Centre, Computing Café, Lloyd Technology & Business Incubator along with multiple MOU with industry giants like Nasscom, Servotech, CISCO, Garuda Aerospace etc. we provide overall skill based learning.

Prof. (Dr.) A.L.N. Rao

Dean, Academics & Technical Training

**“When we teach, we inspire. When we train, we transform.
But when we believe in our students, we create a legacy”**

As the Dean of Academics, with over 27 years of dedication in teaching and research, I have seen trends evolve, technologies change, and industries redefine themselves. But one thing remains constant — The Power of Human Potential.

At our institution, academics is not just about textbooks & exams; it's about curiosity, courage, and continuous growth. Our mission is to ensure that every student not only understands technology but masters it. We teach students how to think, solve, innovate, and lead. Our technical training & skill development programs are designed to prepare our students not for the world as it is, but for the world as it will be. To the students reading this — you are not here by chance. You are here because the future is waiting for someone exactly like you. And it's my promise that when you walk out of these gates, you will not just have a degree, but a direction. Not just a resume, but a story worth reading.
